LIQUID FERTILIZER

For general plant growth, a balanced mixture, scientifically mixed, blended and cured. Liquid fertilizer is so potent and efficient that a single spoonful will feed a plant for a month. It contains 8% Nitrogen, 8% Phosphoric Acid, 4% Potash, with trace elements necessary for balanced plant growth.

ACIDATE

Not a fertilizer, but a plant conditioner containing minor elements necessary to plant growth. Excellent for counter-acting alkalinity. Acidate assists Liquid Fertilizer and Acid Plant Food by feeding the plants acid which is necessary for good health.

ACID PLANT FOOD

Especially made for use on acid-loving plants. The elements in this liquid product cause acid-loving plants to flower more profusely and aid in producing larger and more beautiful blooms as well as luxuriant foliage, free from chlorosis.

SULFADATE

An excellent soil corrective and conditioner, also in easy to apply liquid form. It aids in complete and continuous use of plant foods by the plant through its chemical conditioning of the soil.
